CARBON-BASED PLANT NUTRITION

DOUBLE DEUCE™ U

Long-term quality results on greens and high impact turf require products like Essential Green Double Deuce U™ an affordable and unique carbon-based plant Stabilized Nitrogen.

Essential Green Double Deuce U™ is a Stabilized source of Nitrogen made with Urea. Double Deuce U™ provides the safety and color response of Urea with the elimination of its volatility. Made with a proprietary process resulting in a unique emulsion based formulation that along with the surfactant allows the product to penetrate the soil and remain available to the plant without soil tie up. This environmentally friendly solution offers golf superintendents and turf growers a Stabilized safe Nitrogen formulation.

Once Essential Green Double Deuce U™ is applied, the plant can uptake at the root level the nutrient. The addition of soluble carbon, organic acids, and stabilizers gives the plant the needed nutrient for overall plant health.

1. Delivers performance with simplicity.
2. Application is easy through emulsion liquid formulation.
3. Long-term turf and plant nutrient uptake for the ultimate in plant health.

Specially formulated with:

a proprietary organic acid designed to significantly decrease chemical volatility and to increase the Nitrogen availability.

BLACK GOLD™

is a highly concentrated pure source of soluble Humic and Fulvic Acids. Proven for its buffering capacity of sodium and abiotic and biotic stress conditions. Also known for its soil remediation and mineral complexing properties Humic Acids are a proven beneficial addition to any plant nutritional program.
